

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove set out on a cross country RV trip. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

All through their journey, John reacquainted himself with previous business associates along the way. In combination with these conversations and a significant event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a substantial marketplace for a product that could swiftly and securely lift individuals in the air to accomplish maintenance and other construction services.

Upon returning from their travels, John formed a partnership with two friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they created and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into current designs.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the company proudly continues to expand itself into numerous markets worldwide and develops new products to make sure customers are capable of being more efficient and perform in the workplace within a safer environment.
