

Electrical Parts for Forklifts

Forklift Electrical Parts - Lift trucks can be particularly marked for use in dangerous locations. A marked lift truck indicates the design has met the minimum standards of ANSI/UL 558 meant for engine powered trucks or ANSI/UL 583 utilized for electric forklifts for the type of label attached.

The application for labels used for lift lift trucks could be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Type Designations, Areas of Use, and Maintenance and Operation. Consult your local insurance provider and Fire Marshall for additional info about the approved uses of industrial powered lift trucks in your application.

If the specific forklift satisfies the outlined criteria, labels can be put. A labeled forklift will show the type of designation put on the nameplate and would have a correctly corresponding label placed.
