With a system consisting of over 90 autonomous dealers, the lift truck group supplies quality materials handling equipment to the wide-ranging North American market. Doosan Infracore America Lift Truck sellers successfully operate in over 220 service and sales locations throughout Canada and the U.S. The forklift product line remarkably features 63 distinctive models consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous vehicle designs vary from 3,000 to 33,000 lbs. All vehicles are designed in an ISO 9001 certified facility.

Doosan Infracore America is the fastest emerging forklift and lift truck corporation in the North American marketplace, due to its excellent level of product performance and their persistently high level of client support and service given to all Doosan Infracore Lift Truck users. The U.S. lift Truck division situated in Cleveland has a expert team knowledgeable in Sales, Purchasing, Advertising, Logistical and Technical Support.

In the beginning the domestic lift truck market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled lift trucks as part of a home-based machinery expansion venture. Sales of these goods were initially targeted to state-run corporations, large scale businesses, and the military. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical instruction grew to become the new focus for improving quality and product development.

Daewoo began the first domestic lift truck business in 1967, and rapidly acquired a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological enhancements combined with sales success placed them in a position of significant expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint enterprise project to respond to competitive pressures in the US materials handling industry. This venture drastically expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a modern plant which helped establish the company for the fabrication of high added-value products suited for export. In 1993, the company had a international sales network and started exporting designs they had established through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas markets.
